GREATER ROCHESTER, NY SCLERODERMA FOUNDATION SUPPORT GROUP

University of Rochester Medical Center
601 Elmwood Ave
Rochester, NY 14642
1:00 p.m.

Leader: Marilyn Sibley
(585) 234-0398
(585) 723-1026
Rochester@scleroderma.org

WHAT IS SCLERODERMA

Literally, scleroderma means “hard skin”; however, the disease is better defined as being characterized by a hardening of the body’s connective tissue.

Approximately 300,000 individuals in the United States are affected by the disease, African-Americans more frequently so and at an earlier age. Scleroderma is a chronic, autoimmune disease which, while currently having no cure, has several new treatment options that improve quality of life and life expectancy.

DEAR FRIENDS,

Each of our meetings will feature open discussion, a guest speaker or DVD presentation on topics that provide information and skills needed to help cope with chronic illness. We hope you will join us as we provide an atmosphere of camaraderie and mutual support.

Your Tri- State Volunteer,
Marilyn Sibley

.....

TRI-STATE SUPPORT GROUPS OFFER

- Mutual support to people with scleroderma.
- An opportunity to talk with others who have gone through similar health challenges.
- A chance to share experiences, practical suggestions, and ways of coping.
- A welcome place to get information and learn from others in a warm and caring atmosphere.
- Educational information provided by the Scleroderma Foundation.

TRI-STATE’S THREE-FOLD MISSION:

Support

To provide education and emotional support to people with scleroderma and their families.

Research

To stimulate and support research designed to identify the cause of and cure for scleroderma, as well as improve methods of treatment.

Education

To enhance the public’s awareness of this disease.
